

# PHONEBOOK PROJECT

COMPUTER SCIENCE PATHWAY PROJECT

## **Group 1**

Asitha Sudesh Nirmal Juwandara Appuhamilage

Ghazanfar Abbas

Meegahakumbure Gedara Thusitha Kumara

Sajith Prashan Appuhamy Ranasingha Arachchilage

W Mudiyanseelage Susani Imeshika Menike Weerasekara

## 1. WHY WE CHOOSE THIS PROJECT

- Combines “practical functionality” with “straightforward implementation”.

## 2. APPROACH:

- Started by defining the core functionalities
- Designed a simple user interface using Jupyter

### 3. CHALLENGES:

- Struggled with Storing and Retrieving Contacts.

### 4. SOLUTIONS:

- Created functions to handle input.

## 5. TEAMWORK

- Division of tasks based on each member's strengths.

## 4. SOLUTIONS:

- Used GitHub and Google Colab.

## 6. VERSION CONTROL

- Used GitHub and Google, Colab.

## 7. MEETINGS

- Held daily meetings to discuss our progress and challenges

## 8. CONCLUSIONS

- This enhanced our understanding of data management and user interaction in programming.
- Learned valuable lessons about collaboration, problem-solving, and adaptation.

## 9. WHAT WAS GOOD

- Improved our coding skills
- deepened understanding of Python functions

## 10. WHAT WE COULD NOT SOLVE

- Implemented basic features
- not enough time to incorporate advanced functionalities

**Thank You**
